

Builds Green Ready Homes

Green Ready Building Processes and Materials

Benefits of your GREEN ready Pennwest Home

- Lower heating and cooling bills
- Lower maintenance costs
- Lower water bills
- Healthier living environment for family
- Environmentally friendly for planet

Better Indoor Air Quality

- Pennwest manufacturing systems are not exposed to the weather during construction.
- Low Volatile Organic Compound paint
- Shaw carpeting-CR-1 green label insures low chemical emissions.
- Radon vent to exit harmful Radon gas
- Moisture resistant drywall installed around tubs and showers

Pennwest Homes builds Energy Star® which help reduce your heating and cooling costs.

Natural Resource Efficient Materials

- Designed/Engineered roof trusses
- O.S.B. floor decking, roof decking and exterior wall sheathing
- Laminated Veneer Lumber (LVL) beams for room spans and selected headers
- Water conserving 1.6 gpf toilets
- Pex plumbing instead of metal "mined materials"

Pennwest GREEN Features

- Programmable thermostat
- Energy Star® appliances
- Energy Star® rated windows
- Recessed fluorescent lights
- Cellulose roof insulation
- Rebond carpet pad
- Natural wood trim and moulding
- Fiberglass wall insulation
- High Efficiency gas furnaces (90%)
- 6" exterior walls with R-19 insulation
- House wrap (wind and vapor barrier)
- Ice guard on the roof

Pennwest GREEN Ready/Energy Star® homes help reduce energy bills, offer lower maintenance, provide healthier indoor air quality and improve the environment.
